The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lazaridis et al in view of Nakata et al. Publication # 2002/0188515

Lazaridis et al disclose a method of sending a text message from a PC (26) located on a LAN (14) through the Internet (18) into gateway (20) and onto pager (24), col. 6, lines 31-32. Lazaridis et al do not disclose the header of the message indicating what time the message should be delivered. However, Nakata et al disclose in Figs 8a,8b a mobile phone that will deliver messages. In the message from the mobile phone is delivery instructions as shown in Fig. 17. Fig. 17 shows that the sender can request a desired delivery date, right hand side of drawing. To have provided Nakata's teaching of delivering the message to the intended recipient at a certain time and in accordance with delivery instructions from the sender in Lazaridis et al text messaging system would have been obvious to a person having ordinary skill in the art because of the nature of the material being sent. In Nakata's case he is sending food (Under "package Information - Item Name") and he wants to make sure that the item is delivered when the recipient desires it to be delivered.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 2645
